

Water For All

Is Pleased to Announce,

2008 Low Cost Water for the Poor, Rural Development Seminar

Introductory Well Drilling Courses with Water For All “Baptist” Low Cost Manual/Motorized Well Drilling and Pump Technology

Two 5 day courses this year. Dates

Monday July 21th through Saturday July 26th.
Monday Aug. 4th through the Saturday Aug. 9th.

Location: Duncan Ranch, San Angelo, Texas

Participants: For Non Profits and NGOs, Development Workers, Missionaries, Mission Team Leaders or anyone wishing to be introduced to the WFA drilling technologies used to teach poor rural families to drill their own water wells manually or with a small 3 hp motorized drilling rig.

Purpose: This course is an end user course and will introduce participants to WFA technology via hands on drilling and pump building. If you are interested in helping the poor provide themselves water, this is the course for you. Over 2,000 low-cost wells have been drilled using WFA appropriate technology in over 9 countries. WFA is offering this course in response to many requests. WFA executes rural development programs currently in Bolivia and Ethiopia. This proven technology is the result of 20 plus years of rural development work with the poorest of the poor. This course is open to those of all faiths

but will be presented from a Christian faith and service context. It is an end user for the those planning to help the poor and not for commercial activities where fees are charged for drilling or training.

Course Description and Schedule

Monday

- Morning - Arrival at San Angelo Airport and pickup by WFA personnel for transport to the Duncan Ranch. Registration and signing of training agreement.
- Afternoon - Hands-on Manual Well drilling.
- Evening - Introduction to holistic grass roots rural Christian development and media presentation.
- We will look at systematic ways for churches, non profits, and individuals to directly partner with rural communities to solve food production and water problems. A billion people on the planet still lack adequate water. We will compare the differences between “top down” and true “bottom up” or grass roots approaches that focus on local asset mobilization.
- The potential for training poor families to drill their own low cost water wells and spin off creation of local artisan well drilling businesses by and for the poor will be discussed.

Tuesday

- Morning and Afternoon - Hands on drilling and well completion.
- Evening

Wednesday

- Morning - WFA hands on pump manufacture.
- Afternoon – Hands on pump installation.
- Evening- Further discussion on grass roots development.

Thursday:

- Morning - Drill Bit manufacture demonstration.
- Afternoon - Hands on sample pump (to take home) manufacture

Friday

- WFA low cost community pump well head construction.
- Afternoon- review of entire drilling process. Questions and feed back.
-

Saturday Morning rides to San Angelo Air Port for flights out .

(Plan to arrive Monday and leave Saturday.)

Cost of the course: \$1,000.00. This includes 5 nights lodging, all meals and transport to and from San Angelo Air Port, sample drill bits, sample pump, copy of WFA drilling manual and a seminar certificate. A \$250 dollar reservation is required. All proceeds will go to pay cost of the course and support the WFA international ministry. (If you are poor, from the third world and currently in the U.S. and soon to return, we may be able to look for donors to help with cost of the course. Check with us.)

Venue: The Adobe Lodge on the Scenic Duncan Ranch (20 minutes west of San Angelo.)

Number of Participants: limited to 7 maximum per course this year basis. We will send you a brief application to fill out for us. Preference will be for groups with solid plans to help the poor in a needy area. Contact us today!

New For this Course,

- **WFA's new very low cost heavy duty community well head design for heavy use wells. Designed to allow for super quick change of leathers and general maintenance while only adding a few dollars to the cost of each well. Can be made in any village shop.**
- **Alternative motorization techniques for our drilling method with any vehicle.**
- **News reports from Bolivia, Malawi, Kenya, and Togo.**
- **Demo of WFA low cost windmill.**

How to apply for the course:

Email: Kim Edlund [Stateside Coordination Water For All]

ksedlund@mindspring.com or call 512-658-3985

Fill out an on-line application form.

Upon approval, send a \$250 check made out to: Southland Baptist Church

“Water For All drilling course” in the memo.

Send checks to:

Kim Edlund
5000 Marshall Ford Road
Austin, Texas, 78732

We will hold your email or phone call reservation for 7 days and confirm by email when we receive your check.

The balance of payment will be due upon your arrival at Duncan Ranch.

Participants will be asked to sign this end user training agreement upon arrival.

We ask that any person, groups or organizations that participate in WFA training activities or person groups or organization later trained by you to use WFA tools or technologies agree to,

1. Stay in touch, we want to learn from you too. Maintain contact with WFA via email if WFA technologies or practices are used or attempted, and inform WFA of outcomes, either positive or negative so that we can inform our supporters.
2. Let folks know where you learned it. If WFA developed technologies or practices are attempted and used, WFA will be recognized publicly as the originators of the technologies and interested parties will be referred to us for more information concerning the technologies or practices.
3. Send photos and well data via email of wells made or tools made or used as a result WFA training. (You get all the credit but it will help us inform our supporters of benefits of our training.)
4. Send a brief overview of program and context where WFA tools or practices are being used or tried. (Tell us all about it.)
5. (For Commercial use of our training or technology only) If any commercial activities carried out (fees charged of any kind) reproducing WFA technologies or training courses given (beyond village artisan level) we or those we train will recognize Water For All with a 10 % royalty payment donations of retail prices charged for any courses, tools, drilling charges, drilling rigs, bits, pumps etc. These royalty payments/donations will be used to further the WFA ministry.
6. Remember to have fun getting filthy while helping the poor get water!!! See www.waterforallinternational.org for more information about our ministry.
